Instructions to Access the GR-Energy Program (MIS)

CRES as the Programme Operator of the “GR-Energy” Programme of the EEA FM 2014-2021 presents below the steps that potential Project Promoters should follow to gain access to the EEA Monitoring Information System (MIS):

1. Fill in the application form to create an EEA - MIS user account (ID and password) to the following website: <https://logon.ops.gr> → Create new Account (Beneficiaries).
2. In the section “To Operating bodies”, complete the Programme Operator to which the Project Promoter will submit any requested information (i.e. Proposals), thus select CRES with the “body code” 10403003.

Please note: This also applies to users who already have an EEA MIS account but have not included CRES to the “Operating bodies” to which they have sent a request.

3. Once the completion and submission of the application form has been completed, the application document produced by the EEA MIS should be printed and signed by the Legal Representative of the applicant Project Promoter as well as the applicant. This document is an essential supporting part of the electronic application procedure.
4. Finally, the account will be activated once the signed request is sent to the Programme’s e-mail address: xm-eox@cres.gr
